The Traces collection is a creation of Samir Mazer designed to
bridge ancestral craftsmanship with
modern architectural poetry.
The core creative intention is to capture the ephemeral textures
of Nature—such as geological strata or cracked earth and freeze
them in clay.

Through a concept of "controlled chaos," Mazer introduces
deliberate visual accidents, irregular lines, and asymmetric
rhythms, creating a deeply tactile surface that plays
dramatically with light and shadow.

Ateliers Zelij accompagnies its clients to brings Mazer's
intimate world to each project

With Traces Collection, each model can be customized and adapted
to create a unique pattern that will reflect the identity and
vision of your project

Reach out and tell us more about your project.
With your inspirations and all details, we will provide a fully
customized service

concepts into exceptional spaces

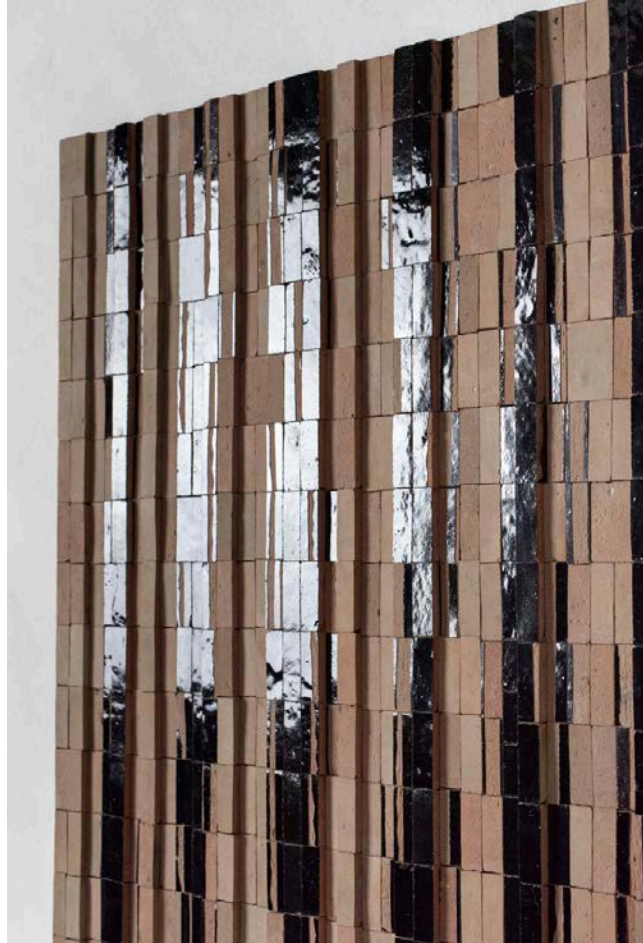

TOTEM

free-standing column h.120 cm, diam. 28 cm

Totem YasMin

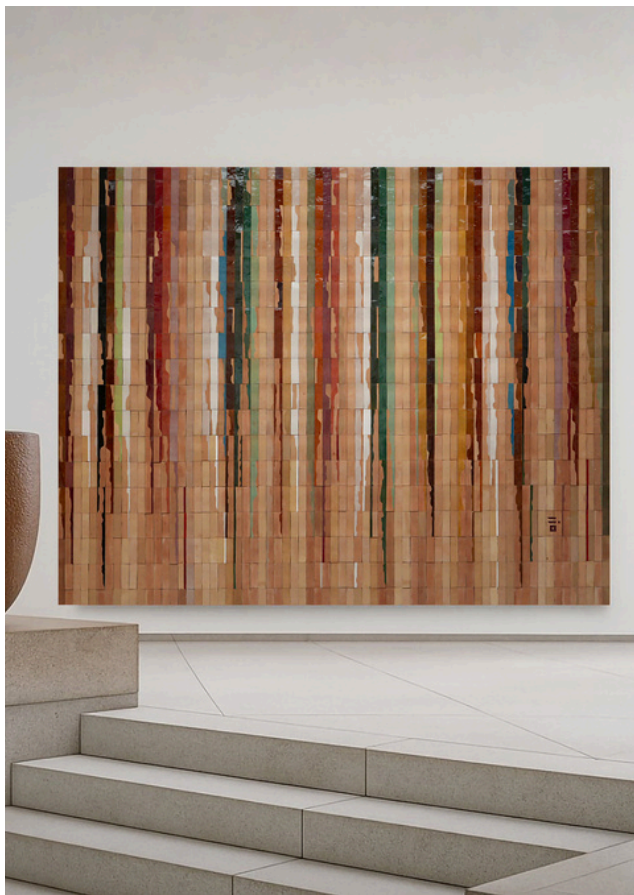

h. 95 cm, l. 79 cm
Mandil

Artwork is a collection that brings Mazer's intimate artistic world to life. Conceived as artworks rather than conventional surface designs, these pieces explore scale, composition, relief and materiality to create a stronger dialogue between art and architecture. Each work retains its singular character while allowing the language of the artwork to extend into space.

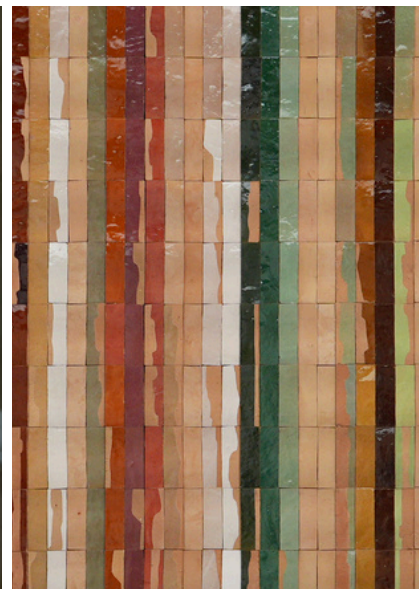

Ateliers Zelij accompagnies its clients to craft exclusive, design-led pieces tailored to each project, transforming concepts into exceptional spaces.
